

# Aptela Desktop Application

## Convenient. Easy-to-use. Free.

The Aptela Desktop is a free application that extends the features of our virtual PBX to your desktop, delivering added control and convenience to business communications. Desktop features provide quick access to new messages, recent calls and company directory.

Don't want to open a browser to log into your Aptela account? No problem. The Aptela Desktop is easy to use, and available at a click's notice. You can close the Desktop window and still remain logged in.

### Aptela Desktop Features:

- Alerts to incoming calls with Caller ID and an option to reject the call.
- Provides real time status of coworkers
- Click-to-call a coworker from within your company-wide directory
- Review voicemails and faxes
- Manage live calls: place on hold, flip to another number, forward, record call, add notes.
- View and update your Find Me List.
- Seamless login to your Aptela user account.
- Minimize the desktop window to System Tray; one click to open.

### System Requirements

- Aptela v5.x Platform users only
- Windows: XP SP2, Vista
- Mac: OS X 10.5.6 or later
- Not yet tested on Windows 7 or Linux configurations

Download the Aptela Desktop today by clicking [here](#), and experience an extension of Aptela's simple application interface.
